

# SMARTED - AI INTEGRATION IN SCHOOLS

2024-1-LT01-KA220-SCH-000244021

## Kick-Off Meeting Newsletter

The Kick-off meeting was held on October 26 and 27, in Zaprešić. During the meeting, partners presented their institutions. Next, the coordinators presented the detailed dissemination plan, risk management plan, quality plan, and work plan for the project. Partners shared their expertise, experience, and good practices related to the use of AI in their everyday work and eTwinning projects. The meeting's outcome has been documented in the form of: a meeting minute and newsletter written by the host, templates for IO1 and a detailed work plan for IO1. created and presented by AraxaEdu, the WP 2 leader.

# SmartEd - AI Integration in Schools

## ABOUT OUR PROJECT

The SmartEd project is inspired by the need to utilize artificial intelligence (AI) to improve education and cater to the diverse learning requirements of students, especially those with special needs. This project will focus on the implementation of cutting-edge AI technologies that will empower educators, engage students, and foster inclusive learning environments.

Additionally, SmartEd project aligns with broader societal goals of promoting equal access to quality education and preparing students for success in an increasingly digital and interconnected world. It will enhance teacher qualifications and ensure that students with fewer opportunities receive a higher quality education at the desired level.

## Coming Up

Through the project activities, students from different countries will have the opportunity to collaborate on challenges related to using artificial intelligence (AI) in the classroom. By exploring how AI can enhance learning and teaching, they'll share their unique cultural perspectives and learn from each other's experiences.

Teachers will also benefit from the exchange of best practices and innovative approaches, collaborating to develop new teaching methods that integrate AI effectively. This will help ensure that digital skills and the responsible use of AI become an integral part of modern education.
